

ABSTRACT OF THE DISCLOSURE

10 A pallet is provided having spaced first and second decks and a plurality of opposed mating areas formed in each of the decks. Each mating area includes alternating projections and recesses, where the projections of the first deck are arranged to be received by the recesses of the second deck and the projections of the second deck are arranged to be received by the recesses of the first deck.

15 Each mating area further includes at least one latch member extending therefrom, where the latch members of one deck are arranged to engage the projections of the other deck such that engagement of the mating areas of the first and second decks securely joins the decks in an assembled configuration.
